Starting today it's the Best Health Care For **All.**

We are born equal, but we are not the same. The best health care meets each individual's unique needs. The NC Health and Wellness Trust Fund's goal is to eliminate health disparities based on gender, class or race. For health care providers, "Care to Act" means doing their part to address health disparities; for individuals and families, it means taking action to live a healthier life. With everyone working together, we can have the best health care for all. **Go to caretoactnc.com today.**
